

KNIME Project GitHub Evidence

Asynchronous Activity 2 | Repository preparation, commit, push, and verification records

Student name	Maersk Harner A, Mabalot
Course and section	BSCSSSE AN43
Repository	Mabalot-KNIME-Activity-2
Repository URL	https://github.com/Aysksream/Mabalot-KNIME-Activity-2
Visibility and branch	Public main
Verified	September 18, 2026 (Asia/Shanghai)

This evidence record documents the required project files, Git history, remote repository contents, and structural review of the exported KNIME workflow. The repository is public and the submitted link opens without sign-in.

1 Project Folder and Required Files

Project file	Size	SHA-256
DemoEarlyWarningTool.knwf	154,022 bytes	7CAB1F42306DE60505F2AF196E1B11DD544BF1662D59D94119EC116E3A7CD98D
README.md	1,117 bytes	03A458096D1FD9958C2153D812EC95836EDDFCCCDFF81EF2A828CBE4BF326681
student_performance_knime.csv	918 bytes	82421541FCEC627A1C3392FE95A3677774E5B153F0BB3A5A194D7D1D7CF9CD9A

Evidence record 1. The project folder contains the exported workflow, README, and dataset required by the activity. The sizes and hashes are recorded from the completed files.

2 Repository Setup

```
repository=https://github.com/Aysksream/Mabalot-KNIME-Activity-2
remote=https://github.com/Aysksream/Mabalot-KNIME-Activity-2.git
visibility=public
branch=main
user.name=Maersk Harner A, Mabalot
```

Evidence record 2. The local repository is connected to the public GitHub repository on the main branch using the student's commit identity.

3 GitHub Repository Capture

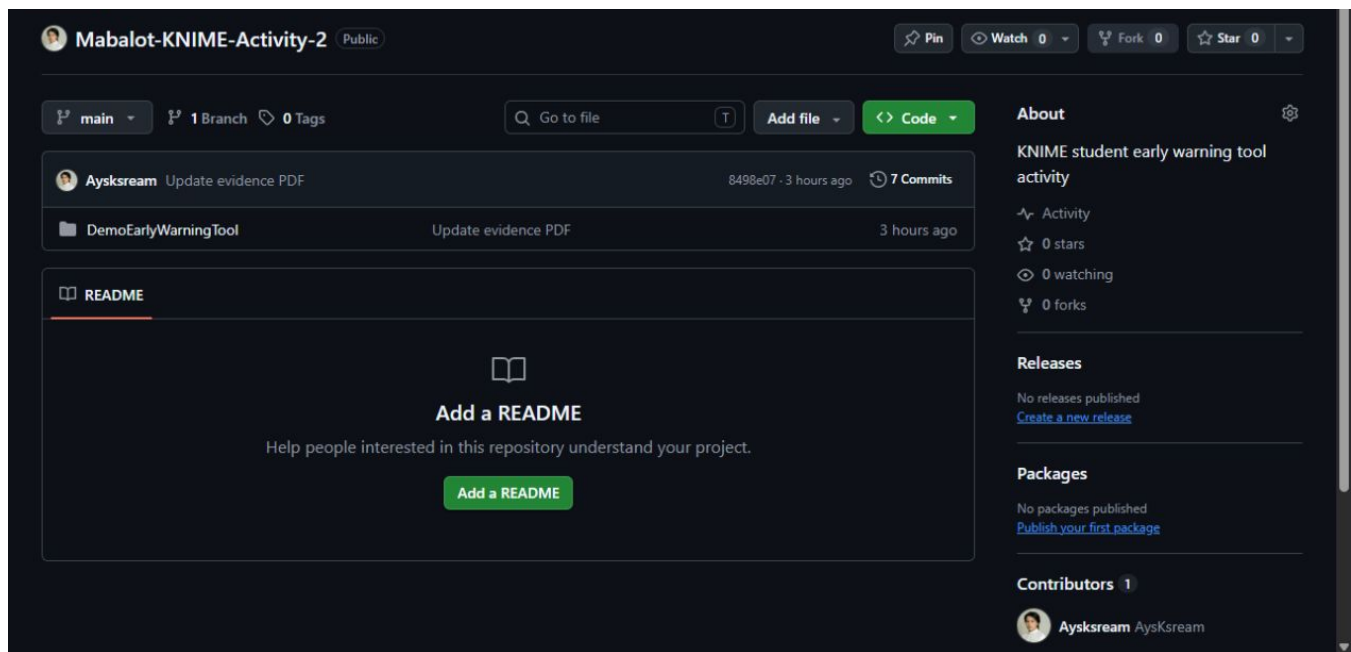

Figure 1. The public Mabalot-KNIME-Activity-2 repository on the main branch shows the DemoEarlyWarningTool project folder during online verification.

4 Project Folder Capture

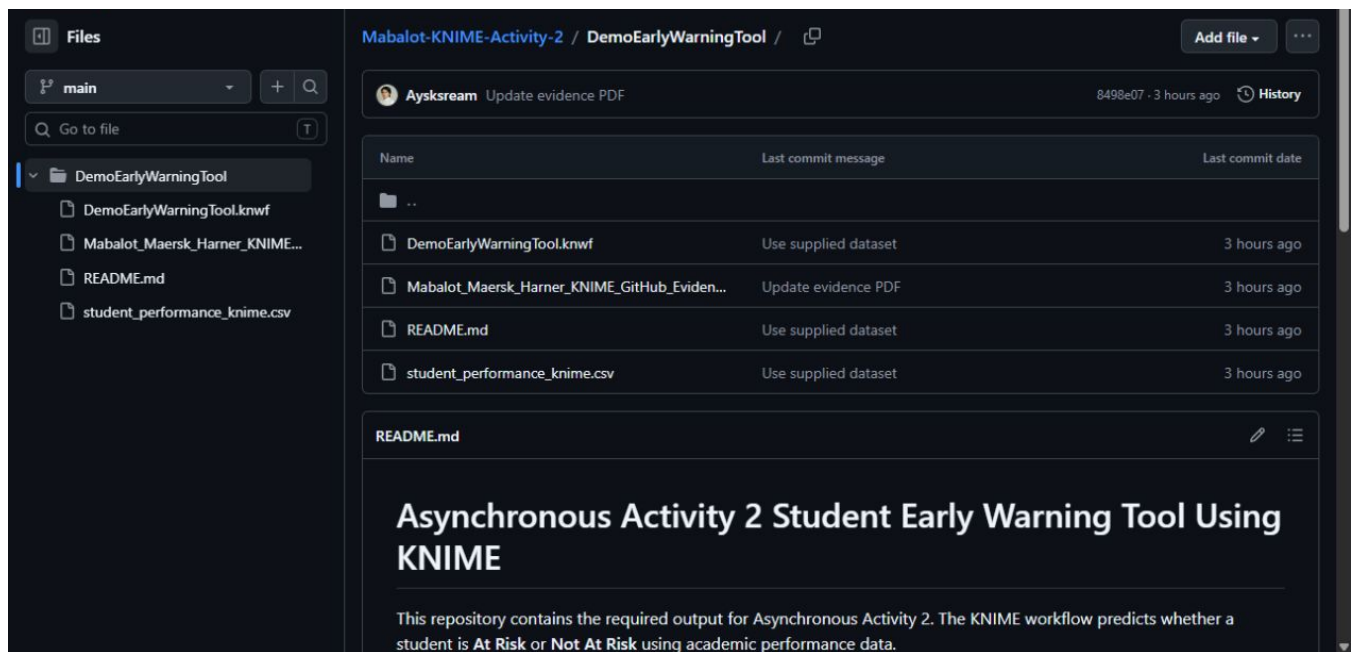

Figure 2. The DemoEarlyWarningTool folder shows the exported workflow, README.md, dataset, and the Activity 2 project description.

5 Commit and Push Results

Commit	Message	Author
8498e0729cb2	Update evidence PDF	Maersk Harner A, Mabalot
813acface319	Use supplied dataset	Maersk Harner A, Mabalot
e013d65db093	Simplify evidence PDF design	Maersk Harner A, Mabalot
1d009d6fa850	Update step-by-step evidence PDF	Maersk Harner A, Mabalot
9e8c4fb534cf	Add step-by-step evidence PDF	Maersk Harner A, Mabalot
ba709900f786	Fix KNIME data partitioning	Maersk Harner A, Mabalot
8c72092d5e2b	Add KNIME workflow and project files	Maersk Harner A, Mabalot

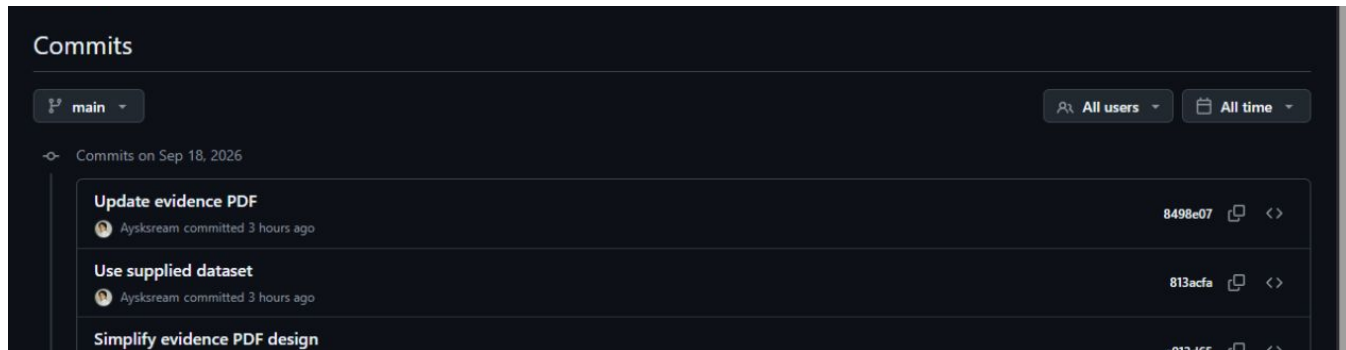

Figure 3. The public GitHub commit history was reviewed before this evidence update. The verified commit record and branch are listed above and below this capture.

```
verified_pre_update_head=8498e0729cb23d1786f81ce219a80006386732e8
verified_pre_update_message=Update evidence PDF
branch=main
push_result=completed
```

Evidence record 3. Before this PDF update, the repository history contained 7 completed commits and the verified remote head was 8498e0729cb23d1786f81ce219a80006386732e8.

6 GitHub File Verification

Path in repository	Size	Git object
DemoEarlyWarningTool/DemoEarlyWarningTool.knwf	154,022	c654fe8e153a82c45277898b489c44bc31316c4f
DemoEarlyWarningTool/README.md	1,117	d3936bd3ed17704944e293cefd890d249937e0c
DemoEarlyWarningTool/student_performance_knime.csv	887	1ccfa16a9476d3cd772142f2606f08b43ce15ce2

Evidence record 4. The required workflow, README, and dataset were opened from the public GitHub repository and their stored sizes and Git object identifiers were confirmed.

7 Required GitHub Structure

Mabalot-KNIME-Activity-2/ DemoEarlyWarningTool/ DemoEarlyWarningTool.knwf README.md student_performance_knime.csv Mabalot_Maersk_Harner_KNIME_GitHub_Evidence.pdf
--

Evidence record 5. The evidence PDF is placed in the same project folder for the final commit and push.

8 KNIME Workflow Structure Check

The exported workflow archive XML was reviewed for its recorded node and connection structure.

Check	Recorded result
Archive XML	Parsed successfully
Nodes	13
Connections	15
Learner input	Training partition
Predictor input	Test partition
Target leakage node	Removed
Optional diagnostic nodes	Removed
Target field	risk_status
Prediction field	Prediction (risk_status)
Result	Passed

Evidence record 6. The exported KNIME file contains the expected connected workflow structure and uses separate training and test partitions.

Partition Connections

From	To	Partition
Table Partitioner #9	Decision Tree Learner #11	Training
Table Partitioner #9	Logistic Regression Learner #10	Training
Table Partitioner #9	Random Forest Learner #12	Training
Table Partitioner #9	Logistic Regression Predictor #13	Test
Table Partitioner #9	Random Forest Predictor #15	Test
Table Partitioner #9	Decision Tree Predictor #14	Test

9 Final Submission Record

Requirement	Status
Public GitHub repository opens without sign-in	Verified
DemoEarlyWarningTool project folder	Verified
Exported .knwf workflow	Verified
README.md	Verified
Dataset	Verified
Recent commits visible on main	Verified
Evidence PDF in project folder	Verified online
MS Teams repository-link submission	Pending - user must submit repository link in MS Teams

Repository Link

<https://github.com/Aysksream/Mabalot-KNIME-Activity-2>

Evidence PDF Filename

Mabalot_Maersk_Harner_KNIME_GitHub_Evidence.pdf

Submission Note

Open the assigned activity in Microsoft Teams, paste the repository link, and select Turn in. This final submission action remains pending for the student.

10 Final GitHub Folder Capture

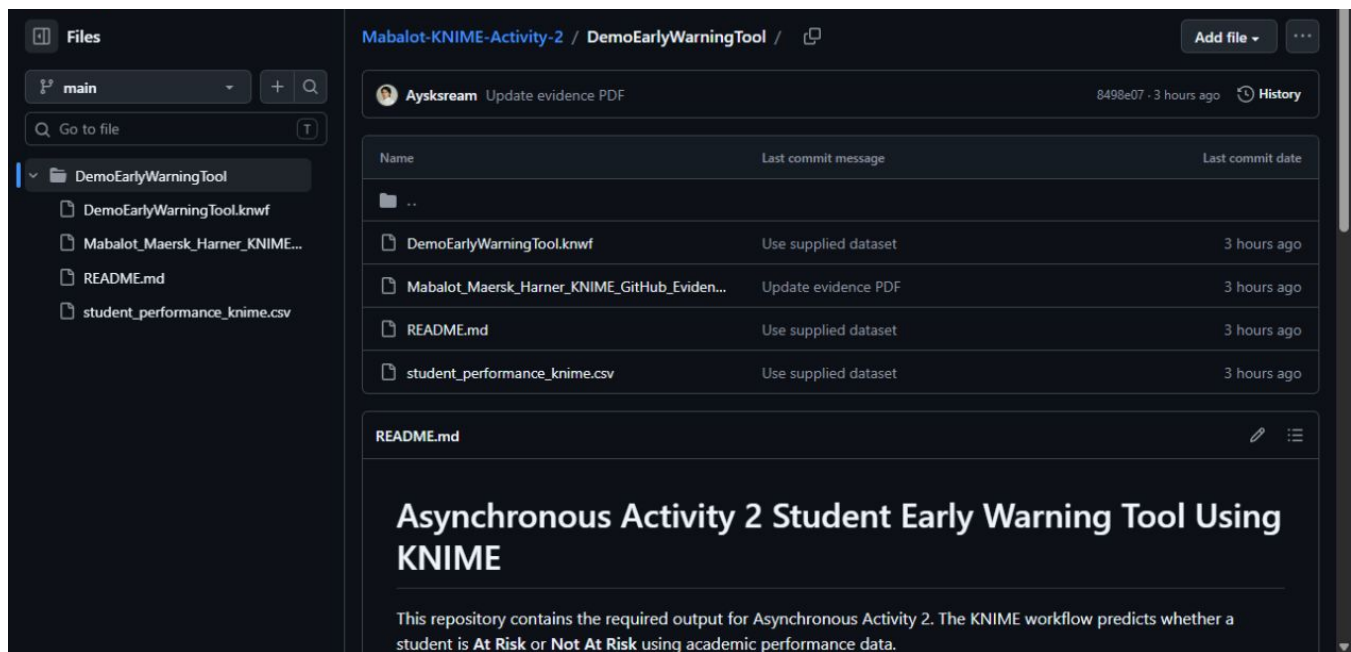

Figure 4. The final GitHub folder view includes the evidence PDF with the workflow, README, and dataset.

11 Evidence PDF Opened on GitHub

Figure 5. The GitHub file page shows the evidence PDF selected inside the DemoEarlyWarningTool project folder and available in the file viewer.

Online check	Result
Repository path	DemoEarlyWarningTool/Mabalot_Maersk_Harner_KNIME_GitHub_Evidence.pdf
GitHub file page	Opened successfully
Repository visibility	Public
MS Teams submission	Pending - user must submit repository link in MS Teams
